IN THE EYES OF THE LAW

Big City

Big City is an original, monthly, text-based fantasy/ crime drama set in a modern world, not unlike our own. Each episode follows the lives of 2 police detectives, 2 P.I.s and a journalist as they fight crime and injustice in world where murder and drugs mix with racial tensions between Goblins and Elves. Where Vampires, once misunderstood and feared, have started the long process of integration into society. Where the police once kept witches and wizards on the payroll as consultants. Where werewolves are no longer killed, they're treated. A place where the magical is mundane and beings of all kinds must learn to work, live, love and fight temptation together. A place called Big City.
